

Contest Rules

More or Less:

- More or Less is exactly how it sounds. You select from 2 to 5 players and determine if they're going to end up scoring more or less than the stat value selected. This is considered a Pick and can be found on the Pick tab after your selection is made. (e.g if you believe Patrick Mahomes will throw for more than 300 yards, you would choose More)
- The payout structure for winning entries is below. You need to win all your selections for your entry to be graded a win.

2 players- 3x payout

3 players- 5x payout

4 players- 10x payout

5 players- 20x payout

- Insurance payouts are made to minimize your risk. Those payouts are below.

Entries with a tie/void revert down to the next closest entry:

5-pick Insurance Entry (10x) → 4-pick Insurance Entry (6x)

4-pick Insurance Entry (6x) → 3-pick Insurance Entry (3x)

3-pick Insurance Entry (3x) → 2-pick Standard Entry (3x)

The following are the payouts associated with Insured entries with 1 losing selection:

5-pick Insurance Entry with 1 loss: 2.5x

4-pick Insurance Entry with 1 loss: 1.5x

3-pick Insurance Entry with 1 loss: 1x

Weekly/Daily Token Contests:

Every user pays an entry fee or enters for free depending on the contest selected. Each user is assigned 1000 tokens after they enter. The goal of the contest is taking those tokens and winning the most picks to rank up on the leaderboards and win cash prizes.

- You place your tokens on any player stats you want exactly like “More or Less”. You select more or less of a player’s stat then place any amount of tokens you wish.
- You need to win all your selections for the pick to be graded a win
- The payout for tokens is below.

1 player- 1x payout (Place 10 tokens you get 10 tokens)

2 players- 3x payout

3 players- 5x payout

4 players- 10x payout

5 players- 20x payout

- The player with the most tokens wins the contest. Example: Aaron wins all his picks and ends up with 2500 tokens, Alden wins some picks and ends up with 1250 tokens, and Sam wins some picks and ends up with 1150 tokens. Aaron came in 1st place and will receive the 1st place payout, Alden 2nd and Sam 3rd.

General Questions:

- **What happens if a game is cancelled, postponed, or rescheduled?**

If a game is cancelled, postponed, or rescheduled, players that are on involved in those games will be voided/pushed from your entry. If all player’s selected were scheduled to play in a game that is cancelled, your entry will be refunded.

- **What happens if there are stat corrections after my contest is complete?**

We rely on our 3rd party data provider to grade all picks. Whatever is graded is final.

- **What happens for a tie/pushed pick?**

In a More or Less contest, if an athlete ties their projected point/stat value, that pick will be cancelled and removed from the contest. It will be settled as if the player was not active in the game.

Example: In the event a pick is pushed and the entry is still valid, if another pick lost, the entry will be graded as a loss. In the event a pick is pushed and the entry is still valid where all other picks won, the entry will be graded as a win but will pay out for the amount of active players. For example, for an entry of Lamar Jackson (win), Jonathan Taylor (win), and Christian McCaffrey (push), the entry would win, but the payout would be calculated as if the entry was a pick 2 instead of 3.

- **What happens if my selected player's game goes into overtime?**

Overtime statistics are included in all full event contests. In partial game contests (H1 or H2) overtime statistics are excluded and will not be counted.

- **How do I delete my contest entry?**

We're working on creating a delete entry button on the picks page. This will be available as long as it's within 1 hour of your entry and 15 minutes before game time.
